

The "AI-Powered Business Launchpad"

A. The AI Strategy Brief (Lesson 7.1):

- **The Personal Brand Philosophy:** Draft your "Verified Human" statement for your profile. Write your 2-sentence promise to clients regarding how you use AI to enhance speed while providing your own "Human Soul" and local context.

I use AI tools to streamline my research, concept development, and video production workflow. However, all creative strategy, audience engagement strategy, and final editing decisions are handled entirely by me.

- **The Career Insights Report:** Use AI to analyze three job descriptions in your niche. List the 3 most requested "Global Power Skills" the AI identified.

These are the most in-demand global power skills:

Visual Storytelling & Concept Development

Advanced Video Editing & Sequencing

Retention Analytics & Performance-Driven Iteration

B. The Engine Room (Lesson 7.2):

- **The Power Prompt Library:** Create one "Master Prompt" for your niche using the **R-T-F (Role-Task-Format)** Framework.

Role:

Lead Video Content Creator specializing in tech, fintech, and digital platforms.

Task: Analyzing a brand's message and produce a high-converting, engaging video campaign that boosts viewer retention, brand authority, and conversions.

Format:

A Structured strategy which include video Concept Overview , target Audience, key Script hooks, storyboard outline, visual & editing direction, engagement & retention tactics

- **The AI Workflow Map:** List the 3 tools you will use in sequence to finish a project.

Step 1 (Research & Scripting): ChatGPT]

Analyze the client brief, identify target audience pain points, and generate the video strategy, hooks, and script structure.

Step 2 (Creative/Visual Production): [Premiere Pro / After Effects / CapCut]

Film assets, create motion graphics, assemble A-roll/B-roll, and build out the high-fidelity visual edit and sequencing.

Step 3 (Refinement & Optimization): [Retention Analytics]

Conduct pacing reviews, analyze early viewer retention metrics or test feedback, and refine the final cut, thumbnail, and metadata for maximum performance.

C. The Ethical Shield & Impact (Lesson 7.3):

- **The Security Audit:** List 2 specific data privacy rules you will follow when using AI tools (e.g., never uploading client passwords).

- I will never input confidential client information such as account login credentials, financial records, or unreleased private business data into AI systems.
- I will only use generalized, public, or strictly anonymized information when leveraging AI tools for brainstorming, research, or scripting.

- **The AI Impact Report (Mock):** Based on your new workflow, estimate your efficiency gain

Manual Time (estimated): **[e.g., 5 hours]**

Manual Time (estimated):

6 hours (Research, scripting, storyboarding, and editing iterations)

AI-Enhanced Time (estimated): [e.g., 1 hour]

AI-Enhanced Time (estimated):

2 hours (AI-assisted script research, faster hook generation, and a streamlined editing process)

Strategy for "Found Time": How will you use the hours you saved to grow your business?

"I will use those extra 4 hours to update my video portfolio, create client case studies, network, and send strategic proposals to land premium, high-paying video projects."
